

Company Letter

Ideal Pharmaceutical Alliance

Greetings,

Ideal Pharmaceutical Alliance is dedicated to educate the pharmaceutical and allied industries through interactive seminars. Our panel includes two different compliance perspectives, experts who have conducted the inspections (former-FDA inspectors) and those who are experienced in defending pharmaceutical operations (pharmaceutical management practices).

Our seminars address common issues facing pharmaceutical, biopharmaceutical, medical devices vitamins, herbals and companies in regards to the product pre-approval life cycle. Examples of issues covered include. How does a company formally respond to FDA comments following inspection? How does a company conduct effective investigations in the laboratory? To what extent is company required to validate a given system, method or process? These issues and international and local regulatory challenges and solutions are addressed by former FDA inspectors and pharmaceutical industry experts.

The IPA experts also discuss any uncertainties related to manufacturing and compliance of pharmaceutical products. (Clinical Studies, Regulatory Submissions, Stability, Investigations, Process Validation, Computer Systems Validation (CSV), Manufacturing, cGMP's, the USP, Quality Control, R&D, Quality Assurance, Regulatory Affairs, Packaging, and Logistics etc.)

We share our pharmaceutical experience and expertise, and demonstrate ways to achieve FDA and health Canada regulatory compliance in an efficient and cost effective manner. Ideal Pharmaceutical Alliance supports corporate team building. We believe that attending seminars together can help achieve and advance greater understanding of pharmaceutical compliance issues as well as collaboration and teamwork among groups.

Sincerely

Dr. Alia Nawaz, Ph.D. (Protein Chemistry)
President, CEO and Director of Scientific Affairs
